

ADNAN SALIYAWALA

☎ +91-8160054153 ✉ saliyawalaadnan8@gmail.com [in LinkedIn](#) [</> leetcode](#) [🔗 GitHub](#) [📁 Portfolio](#)

Profile Summary

Software Engineer with experience building backend systems using **Spring Boot** and **FastAPI**, and applying **ML models** (Isolation Forest, Random Forest, KMeans) for anomaly detection in network security contexts. Developed FlowZynth, a NetFlow analytics platform with real-time monitoring, **RBAC**, **SSO**, and **LDAP** authentication, and an automated ML pipeline for threat detection. Comfortable working across the stack — from database design and REST APIs to Angular frontends — with a focus on writing clean, deployable code.

Education

Parul University <i>Master of Computer Applications (M.C.A.) - Cloud Computing, CGPA: 8.65/10</i>	2023 - 2025
Navrachana University, Vadodara <i>Bachelor of Computer Applications (B.C.A.), CGPA: 8.58/10</i>	2019 - 2022

Technical Skills

Programming Languages: Java, Python, HTML5, CSS3, JavaScript, SQL, TypeScript
Frameworks & Libraries: Spring Boot 2.7, FastApi, Angular 17, React 18, Tailwind CSS, Spring Security 3
Databases: MySQL 8.0, Firebase, ClickHouse, SQLite
Tools & Technologies: Git, GitHub, Docker, ClickHouse CLI, Spring Tool Suite, Firebase Authentication

Professional Experience

NETZIYA Pvt Ltd, Godhra <i>Software Engineer – Product Development (FlowZynth NetFlow Project Lead)</i>	Jul 2025 - Present
- Led end-to-end design and development of FlowZynth, an enterprise NetFlow analytics and security monitoring platform processing 1M+ flow records/min - Architected dual-database system (ClickHouse + SQLite) improving query performance by 5x and enabling sub-second analytics on 50M+ records/day - Built ML-based anomaly detection system (Isolation Forest, Random Forest, ExtraTrees, KMeans) achieving 92%+ accuracy and reducing false positives by 35% - Implemented real-time drift detection and behavioral profiling detecting new attack patterns within 5-minute windows - Engineered automated ML pipeline with model persistence and retraining improving detection efficiency by 40% - Packaged platform as a production-ready OVA appliance enabling one-click deployment across VirtualBox and VMware - Designed enterprise authentication system integrating SSO, LDAP, and RBAC supporting secure multi-tenant access for 1000+ users - Developed secure licensing and activation system with feature gating and subscription-based access control - Configured FortiGate and Cisco devices enabling ingestion of 10K+ flows/sec for real-time monitoring - Designed database-agnostic backup and restore platform with one-click recovery across SQLite, PostgreSQL, and MS SQL Server, reducing downtime by 70% - Built real-time dashboards reducing incident response time by 60% - Built cross-platform EDR endpoint telemetry agent (Netziya Agent) collecting DNS, process, filesystem, USB, Windows Event Log, and system-info/public-IP telemetry; ported the agent from Windows to Linux (Ubuntu 18.04–24.04) while preserving ClickHouse schema/field compatibility - Designed a seamless infinite-scroll architecture for million-row telemetry event views: cursor-based backend prefetching combined with frontend sliding-window virtualization (constant 2-3 batch memory footprint), backed by a ClickHouse hot/cold table split (1-month hot table, older data rolled to a cold table, unified through a view) — eliminating loading pauses at scale - Leading NetPulse NPM, a new SNMP-based network performance monitoring prototype (FastAPI/SQLAlchemy/SQLite backend, React/TypeScript frontend) polling interface stats, LLDP neighbors, ARP, and routing (BGP/OSPF) across network devices	
AccioJob Pvt Ltd, Vadodara <i>Software Development Intern</i>	Oct 2024 - Apr 2025
- Spearheaded full-stack e-commerce prototype using Spring Boot and Angular with 10+ core features and end-to-end functionality - Partnered with 3-member cross-functional team to architect scalable platform supporting 1000+ concurrent users - Integrated JWT-based authentication, real-time order tracking, and flexible coupon system supporting 10+ discount types - Delivered analytics module tracking revenue metrics and generating automated sales reports for 5+ key performance indicators within 24-hour cycles	
Shree Drashti Infotech LLP <i>Trainee Android Developer</i>	Jan 2022 - Apr 2022
- Engineered real-time messaging application in 12 weeks with user authentication, media sharing, and notifications using Android Studio, Firebase, and Java - Streamlined app performance improving efficiency by 20% and reducing crash rates by 80% - Produced technical documentation and project reports boosting team communication effectiveness by 30%	

Projects

Aara-V2 E-commerce Platform | *Java, Angular, Spring Boot, Spring Security, JWT, MySQL, RESTful APIs*

- Constructed full-stack e-commerce platform with Java/Spring Boot backend and Angular frontend delivering 20+ functional modules with mobile-responsive design
- Accelerated backend performance through database optimization and load balancing, reducing latency from 800ms to 200ms
- Established RESTful API infrastructure with 25+ endpoints, improving system throughput by 70% through robust error handling
- Deployed JWT authentication and authorization system achieving 99.5% security compliance rate

ConnectKit | *Android Studio, Java, Firebase, XML, MVVM architecture.*

- Crafted a chat app with live messaging, user verification, group chats, media exchange, and push alerts, increasing user engagement and daily active users.
- Accelerated message delivery speed, significantly reducing unauthorized access attempts by 40%.
- Upgraded group interaction and facilitated media sharing by, promoting increased engagement.
- Enhanced user retention, fostering a stronger and more loyal user community.

Artistry | *Android Studio, Java, Firebase, XML, MVVM architecture.*

- Created an app for artist profiles, project sharing, engagement tools, blogs, user authentication, push notifications, and media storage.
- Integrated Firebase for storage and authentication, utilizing MVVM for effective code management.
- Enhanced content sharing by, and boosted content creation.
- Reduced unauthorized access by 40%, stimulated user activity, and improved media management efficiency.

Certifications

- PHP and MySQL Training (Spoken Tutorial) - Score: 69.44/100
- Computer Networks and Internet Protocol Certification - Score: 76/100
- AWS for Beginners Certificate
